ABOUT ME

Game designer with almost 5 years of experience working in the games industry. I consider myself a curious, committed and ever-adapting designer, willing to learn and to give my best in every project I participate in. I deeply enjoy bringing ideas to life working hand in hand with other developers in a team. In my free time I develop my own projects and participate in game jams.

EXPERIENCE

Game Designer

Tequila Works | January 2023 - Current

- Worked on unannounced AAA adventure project since concept phase to production. Designed mechanics, systems, and combat.
- Prototyped several systemic puzzles, mechanics and features using Unreal Engine 5 blueprints.
- Designed and implemented AI (enemies and NPCs) using Behavior Trees.
- Systems design, balance and tweaking. Proficiency creating balance spreadsheets.

Kids Game Designer

Lingokids | September 2020 - January 2023

- Designed more than 10 educational games, merging them with action, adventure and puzzle elements, published in the Lingokids app. Prototyping using Unity (C#).
- Conducted thorough data analysis and user testing.

VR/AR Designer and Developer

Spika Tech | September 2018 - February 2019

- Narrative and interface design in VR. VR prototyping (UE4).
- Design and development of AR application for a museum (Unity, Vuforia).
